

# BCT-460NAVK

Heavy-Duty Truck  
Electrical System Analyzer

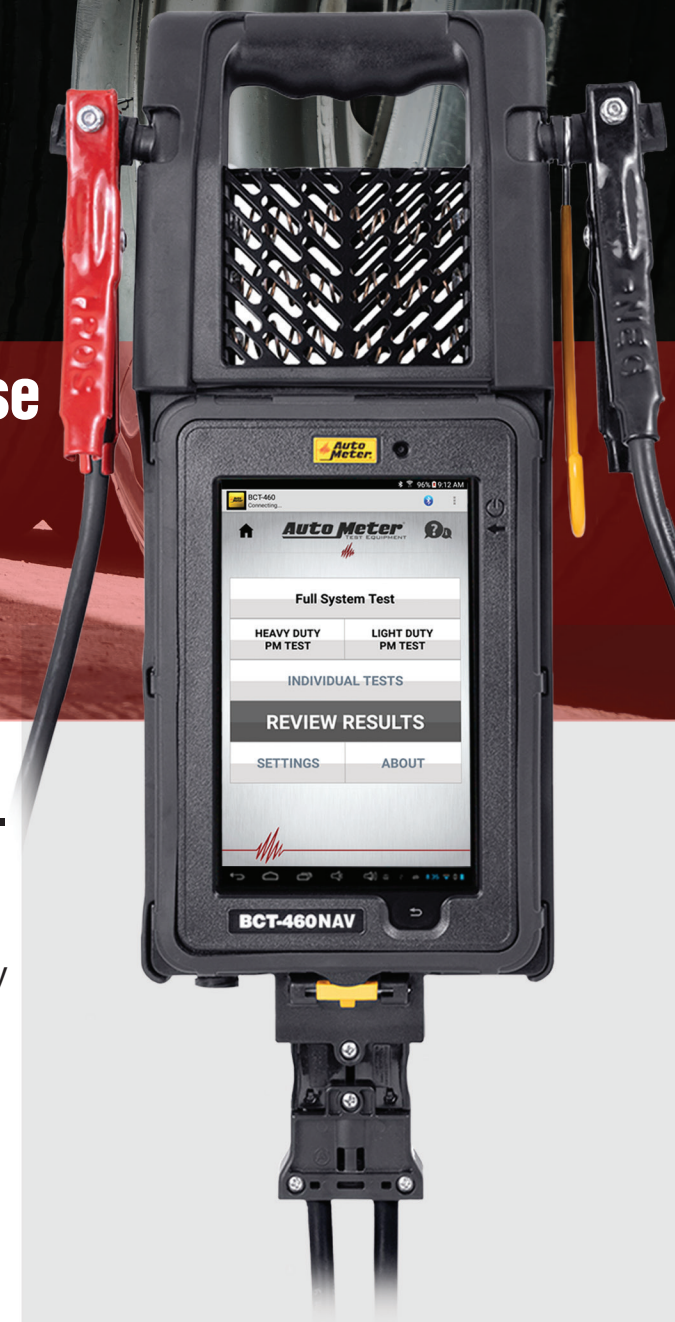

## Tool to Reduce Service Expense

## Identify Electrical System Issues the First Time with Load Based Testing

### Proven Technology for Today's Heavy Duty Fleet Engineered for Future Upgradability

- Simple preventative maintenance (PM) test completed in 2 minutes or less
- Full system test as well as individual tests that follow recommended practice RP-129B for superior accuracy
- Reserve Capacity Test to identify weak batteries that may not adequately support additional vehicle loads
- Ease of use via user guided screens throughout the entire testing procedure
- 2-Piece removable tablet design saves labor by allowing a single tech to perform testing
- Compatibility with thin plate pure lead (Northstar / Odyssey) & AGM technology
- Wi-Fi enabled for real-time data collection and alerts for leveraging data analytics
- Allows a user to automatically store test records in International 360 via AMPNET
- Camera for scanning capability (VIN, QR Code, Truck #, Etc.)
- Automated voltage drop testing on cables, lift gate, stinger cords, magnetic circuits
- 120 Amp true load testing for superior accuracy

CLOUD BASED DATA MANAGEMENT

(Information on the other side)

# NAVISTAR

## CLOUD BASED DATA MANAGEMENT

- Private & secure data storage of diagnostic tool tests
- Real time monitoring of testing activity
- International 360 integration allows for back up and storage of unique vehicle testing records
- Facilitates Predictive Maintenance - Replace electrical system components before they fail
- Identify gaps in proper tool use
- Over the air firmware downloads for AutoMeter Test Equipment

**BCT-460NAV**

**AC-90  
Charging Station**

### **BCT-460NAVK Includes:**

- BCT-460NAV
- AC-90 Docking Station
- IC-20 Amp Clamp
- AC-77P AMPNET Data Management
- AC-111 Wall Charger
- AC-94 20' Voltage Drop Test Lead Set
- Accessories Pouch
- AC-31 Battery Adapter
- AC-98 Starter Adapter
- AC-102 Alternator Adapter
- Instruction Manual (On Tablet)
- Quick Start Guide

### **Specifications:**

#### **12V Battery Types**

- Flooded Lead Acid
- AGM
- EnerSys (Northstar/Odyssey)  
Thin Plate Pure Lead

#### **Load Test Capacity**

- 120 AMP

#### **Battery Ratings**

- CCA, MCA, CA, Ah, En

#### **Screen Size**

- 7 inch Full Color Wide Viewing Area

#### **Cable Specifications**

- Robust 6 Gauge Field Replaceable

0375-21
