- Correct Fatal System Error upon opening

  Known Issues
  - During fault detection, faults may appear and disappear; use OCC Health Report for final diagnosing

HeRo.V5.0.61 (Release Date 6/14/2021)

- Support for new electric vehicles
- Update Engine Detection for Navistar engines
- Highlight Health Reports that are invalid
- Collect faults on all available buses (J1939, J1708, etc.)
- Include Navistar 3 Box engines
- J1708 All Make Support
- Show engine calibration on OCC Health Report for J1708 engines
- Open health report via OCC if available

  Known Issues
  - During fault detection, faults may appear and disappear; use OCC Health Report for final diagnosing

HeRo.V4.2.28 (Release Date 8/7/2020)

- Updates to dialog boxes webpage links

HeRo V4.0.19 (Release Date 1/14/2020)

- Correct sniffer panel messaging
- Correct log file uploads to Navistar server

HeRo V4.0.18 (Release Date 12/2/2019)

- Force update to dealer account and location if detected information is incorrect
- Correct empty fault status on health reports
- Add warning light flashing state

Known Issues

- J1708 All Make Support

HeRo V3.64 (Release Date 06/25/2019)

- Corrected issue reading DTCs on International CV

HeRo V3.63 (Release Date 06/03/2019)

- Total Vehicle Distance is received from cluster odometer, instead of using ECM Parameter

  - All Navistar Engines 2010 – Forward (excludes non-Navistar engines)

- Read International CV engine hours from BCM
- Support GM pin 1 low speed for Nexiq USB-Link 2

Known Issues

- J1708 All Make Support

HeRo V3.51 (Release Date 12/13/2018)

- Additional International CV support
- Correct Engine Serial Number on Health Report View
- Address Warning Lights in Health Report View
- Address Data collection on All Makes Support

Known Issues

- J1708 All Make Support

HeRo V3.48 (Release Date 11/19/2018)

- International CV support
- Complete ACM calibration listed in Health Report
- Add software IDs for detected modules
- Add scan ID to Health Report view
- Correct vehicle signals on Health Report for Generic J1939 Engines

Known Issues

- J1708 All Make Support

HeRo V2.20 (Release Date 09/19/2018)

- Correctly identify engines

Known Issues

- J1708 All Make Support

HeRo V2.17 (Release Date 09/05/2018)

- Display message upon connecting if vehicle information is invalid

Known Issues

- J1708 All Make Support

HeRo V2.16 (Release Date 05/18/2018)

- Correct connection issues with additional Vehicle Device Adapters

Known Issues

- J1708 All Make Support

HeRo V2.14 (Release Date 05/11/2018)

- Add Link for OCC Health Report on Health Report View
- Corrected Change Log Button
- Progress bar when closing HeRo (uploading log files)
- Correct Occurrence Count
- Use Scan Date instead of file timestamp (corrects fail to upload errors)
- Correct scanning of 2002-2006 V6 and V8 engine
- Add module make and model to Sniffer

Known Issues

- J1708 All Make Support

HeRo.121 (Release Date 1/17/2018)

- Remove "Permanently Erased" faults from Health Report
- Add Vehicle Checkpoint Support
- Accept scans from VINs with lowercase characters
- Allow all dealer technicians to change Dealer Account and Location within HeRo

Known Issues

- J1708 All Make Support
- 2002-2006 V6 and V8 Engine
- 2008-2009 MaxxForce 11/13 Engine
- Time Stamp Errors Cause False Failed to Upload Message

HeRo.116 (Release Date 12/20/2017)

- Adds dealer account and location to the reports
- Improved logging for submit failures
- Bug fix to resolve missing engine faults

HeRo.113 (Release Date 11/10/2017)

- Improves fault code collection for all makes engines

HeRo.112 (Release Date 11/02/2017)

- Correct J1708 Fault Code Issues
- More efficient all makes support
- Alter data collection to ensure Health Report upload success

HeRo.109 (Release Date 10/20/2017)

- Address fault code collection issues
- Update support link to correct page

- Enable J1708 engines

Hero.97 (Release Date 10/03/2017)

- Initial release
- Navistar® EZ-Tech® Launcher replacement
